Muhammad Rizwan

Karachi, Pakistan
mrizwanr202@gmail.com | 03002260585

As a Professional and Energetic MERN (MongoDB, Express.js, React.js, Node.js) Stack Developer, I bring a comprehensive skill set in full-stack web development. With expertise in both front-end and back-end technologies, I am capable of building and delivering high-quality web applications. My proficiency in MongoDB, Express.js, React.js, and Node.js allows me to design and develop efficient and scalable solutions. I have a strong understanding of RESTful API development, database management, and UI/UX design. Collaborative and detail-oriented, I thrive in fast-paced environments, working alongside cross-functional teams to successfully deliver projects. With a commitment to staying up-to-date with the latest technologies, I am dedicated to continuously enhancing my skills as a MERN Stack Developer.

March 2016 | 73%

Industries

Software & Web Development

Professional Experience | 1 Year

MERN Stack Developer / ReactJS Developer

GVR IT Solutions | Karachi, Pakistan   Mar 2023 - Present

1. Design, develop, and deploy end-to-end web applications utilizing both front-end and back-end technologies, such as HTML, CSS, JavaScript, React.js, Node.js, and databases like MongoDB or SQL.
2. Collaborate with cross-functional teams to gather requirements, define project scope, and contribute to architectural decisions, ensuring the successful implementation of software solutions.
3. Build and maintain robust RESTful APIs, handling data integration, validation, and authentication, while ensuring high performance and security standards.
4. Perform testing, debugging, and troubleshooting of applications, identifying and resolving technical issues, and implementing improvements to enhance overall system performance and reliability.

Front End Developer

Toobitech | Karachi, Pakistan   Oct 2022 - Mar 2023

1. Develop and implement user interface components using modern front-end technologies such as HTML, CSS, Bootsrap, Tailwind, React Js and JavaScript.
2. Collaborate with designers and back-end developers to translate design wireframes and mockups into functional and visually appealing web pages or applications.
3. Optimize web applications for maximum speed and scalability, ensuring seamless user experiences across different browsers and devices.
